

Ways for Tech Organizations to Participate

We're asking engineers, data scientists, IT project managers, UX/UI designers, and all tech professionals to empower ethics by planning events, facilitating workshops, or publishing articles on or around **October 16, 2024**.

Continue reading to learn how you and your colleagues can get involved.

Ethics is about making the effort to evaluate competing points of view and then truly caring about the impact of the choices you have made. Ethics is not some cure-all for the world's problems, but it is an actual process for finding solutions."

— Joel Rosenthal, president of Carnegie Council

Mapping the Impact of Data Fusion

Data-extracting technology is everywhere. From smartwatches to CCTV cameras, we are surrounded by devices that capture revealing information about our behaviors, interests, beliefs, and location.

In isolation, one or two of these datapoints may seem inconsequential. But what happens when a technology automates analysis of the data we create as we go about our lives?

Ethics in Tech

Event and Workshop Ideas for the 11th Annual Global Ethics Day

Event Ideas

- **Ethical Tech Entrepreneurship Panel:** Host a panel featuring CEO perspectives on the importance of applied ethics in the tech industry.
- **Tech for Good Hackathon:** Organize a hackathon where participants can compete for prizes rewarding the best projects that advance ethical principles and positive societal impact.

Workshop Ideas

- **Ethics of Surveillance:** Which technologies threaten to upend the balance between rights and security?
- **Generative AI Bias:** How can the outputs of generative AI tools be less biased?
